

SCALE BLASTER™

THE WATER SOFTENER ALTERNATIVE

APPLICATIONS

Lumber Industry

Lumber Industry Applications

Rolling Stock

ScaleBlaster will control lime scale deposits in the cooling systems and radiators of trucks, generators and locomotives.

Saw Mills

ScaleBlaster will control lime scale buildup on water jet nozzles at saw blade impingement, debarking hydraulic equipment, dryers, dust collectors, slurry lines, presses, and material handling equipment.

Equipment that is affected by lime scale deposits

ScaleBlaster will aid in controlling lime scale deposits on the following equipment:

- Boilers
- Heat Exchangers
- Rollers
- Transfer lines
- Pumps
- Valves
- Meters
- Scales
- Cooling towers
- Condensers

Energy Savings, Maintenance, Chemical savings

ScaleBlaster will eliminate scale and other deposits on boilers, heat exchangers and cooling towers the affect the process of energy efficiency and add costly maintenance time and expensive chemical costs.

THE WATER SOFTENER ALTERNATIVE
